## STATEMENT OF COMPLIANCE WITH ALABAMA STATE ENERGY CODES FOR RESIDENTALL BUILDINGS

## (2009 IECC with State of Alabama Amendments for Residential Dwellings)

The 2009 International Energy Conservation Code, published by the International Codes Council, when used in conjunction with the State of Alabama Energy and Residential Codes, constitutes the official Alabama State Energy Codes for Residential Buildings. This Code establishes minimum regulations for energy efficient design, erection, construction, and/or alterations of one-and-two family dwellings and townhouses not more than three stories above grade in height with a separate means of egress and their accessory structures. Compliance with this Energy Code by designers and builders is mandatory.

This form must be completed entirely, signe	ed and submitted at the time of permit application.
BUILDING PERMIT NUMBER:	DATE:
JOB SITE ADDRESS:	
CONTRACTOR/BUILDER:	
	above permitted structure shall be built in compliance with the State of owing methods: (Indicate with an "x" the appropriate choice.)
Insulation, Window and Door Requ	uirements by Component (Prescriptive Component Approach)
performance options are being used. Insulation a International Residential Code must be strictly ad	mentation is provided by the builder that either the trade-off or simulated and window requirements prescribed in the 2009 IECC or Chapter 11 of the dhered to in addition to the <i>mandatory</i> requirements for building envelope air rical, HVAC). Applicants must complete the Energy Code Prescriptive Approach pplication and the construction plans for review.
REScheck with 2009 IECC as choser	option (Component UA Trade-off Approach)
construction plans for review. REScheck is available allows you to demonstrate compliance with the value building envelope components as well as receive using REScheck, you must use the <b>Alabama</b> version <i>'REScheck Software User's Guide'</i> , while at the DC software program correctly. After download and	EScheck report along with a building permit application, this form, and the ole as a free download at <a href="http://www.energycodes.gov.rescheck/">http://www.energycodes.gov.rescheck/</a> . REScheck weighted-average SHGC requirement and to perform simple trade-offs among credit for higher than standard heating and cooling equipment efficiencies. If on. Unless you are familiar with using REScheck software, download the DE website. The user's guide is imperative to understanding and using the to establish the correct minimum compliance values for us in Alabama select on. REScheck will automatically preset all climatic defaults specifically for IECC
application. One copy will be stamped "Reviewed	port for the work to be permitted must be submitted with each building permit I For Codes Compliance" and will be given back to you at permit issue. This copy inspectors during inspection. The remaining copy will be retained for City
Mandatory requirements for building envelope a	ir sealing and mechanical systems must be met even if using REScheck.
IECC Section R405 (Simulated Perf	ormance Approach)
comprehensive analysis showing that the predict a <i>standard reference design</i> (the same home built	ay to meet the code's goal of effective use of energy based on a ed annual energy use of a <i>proposed home design</i> is less than or equal to that of t to meet the prescriptive criteria in the code). Because of the level of detail used for residential buildings. Please contact the Building Official for more
