

# Phase II Storm Water Program

Fall 2019

## Pesticide Clean Day

The Russell County Extension Office has announced that an Agricultural Pesticide Clean Day has been planned for this area of Russell and Lee Counties on November 13, 2019. This cleanup is a joint effort between the Alabama Department of Agriculture and Industries and the Alabama Cooperative Extension System, to allow for harmful chemical containing products to be disposed of easily. You will not be charged for the disposal of these products. The maximum amount to be allowed per vehicle will not exceed 1,000 pounds. If you wish to participate you will need to complete a Pesticide Registration Form and return it to your local extension office on or before November 11, 2019. After your registration form is received, you will be contacted and provided all the collection details. It is important that the form, with inventory, is completely filled out and that accurate information is provided. If you have any questions please contact the Alabama Extension - Russell office at (334) 298 - 6845.

**Disposable products that will be accepted:** known and unidentifiable pesticides, insecticides, fungicides, herbicides, and rodenticides, as well as other products such as defoliants, adjuvants, and growth retardants.

**Disposable products that will NOT be accepted:** explosives, compressed gas cylinders, petroleum products (motor oil), paints, tires, medical waste, radioactive materials, dioxin precursors, or seeds.

Registration ends on November 11, 2019.
